

CUSTOMER CHURN ANALYSIS

Data Insights & Retention Recommendations

1. Executive Summary

Analysis of 7,043 telecom customer records shows an overall churn rate of 26.5%. Churn is heavily concentrated among month-to-month contract holders, customers in their first few months of tenure, fiber internet users, electronic check payers, and senior citizens.

2. Key Performance Indicators

7,043 Total Customers	26.5% Churn Rate	73.5% Retained	Month-to-Month Highest-Risk Segment
---------------------------------	----------------------------	--------------------------	---

3. Key Findings

Factor	Key Numbers
Contract Type	Month-to-month: 43% churn vs. Two-year: 3% churn.
Tenure	Most churn occurs in the first few months of service.
Internet Service	Fiber optic: 42% churn vs. DSL: 19% churn.
Add-on Services	No Online Security/Tech Support: 2-3x higher churn.
Payment Method	Electronic check: 45% churn vs. Automatic pay: ~15-17%.
Senior Citizens	42% churn vs. 24% for younger customers.
Gender & Streaming	No meaningful impact on churn.

5. Recommendations

- Push longer contracts — offer discounts to move customers from monthly to annual plans.
- Strengthen early onboarding — most drop-offs happen in the first 2-3 months.
- Encourage automatic payments — shift users away from electronic checks, the highest-churn payment method.
